5.	Merchant Daily Dashboard What a merchant sees at 9 AM, 1 PM, and 9 PM. The day on one screen.	high
6.	Customer Psychology & Recognition Loyalty isn't just rewards. It's feeling seen. VIP, milestones, streaks, celebrations.	high
7.	Win-back Escalation (30 / 45 / 60 / 90 days) A 4-stage ladder from gentle nudge to personal owner call. Never lose a customer silently.	high
8.	Google Review Engine (Restored Core Pillar) Stamps + Referrals + Reviews = the 3 pillars. Reviews drive new customer acquisition.	high
9.	Birthday Journey Birthday = highest-revenue visit of the year. Automated, personalized, never missed.	high
10.	First Refund - The Trust-Building Moment How a merchant handles their first refund decides if the customer ever returns.	high
11.	Lost WhatsApp Number Customer changed phones, lost WhatsApp. How do they keep earning stamps?	high
12.	Duplicate Customer - Merge & Clean Same customer registered twice with slightly different names. How to fix without losing history.	high
13.	Reward Out of Stock - Alternative Offer Customer wants the free brownie. It's out of stock. Don't lose the moment.	high
14.	Merchant Changes Reward Rules Mid-Program Bakery decides to switch from 'buy 9 get 1' to 'buy 6 get 1'. What happens to existing cards?	high
15.	Customer Upgrades to VIP - The Big Moment The exact moment a customer crosses into Gold or Platinum tier. Make it memorable.	high
16.	Reward Expiry Completed stamp cards don't last forever. But expiry should feel fair, not punitive.	medium
17.	Multi-Branch Expansion (Future-Proof) Sweet Crumb opens a 2nd location. Same loyalty program across both.	medium
18.	Family Accounts Mother, father, son - same household. Shared rewards? Separate? Flexible.	medium
19.	Merchant Support Journey When the merchant has a problem, support must feel like a partner, not a vendor.	medium

- | | | |
|------------|---|--------|
| 20. | Customer Data Deletion (GDPR / DPDP)
Customer asks 'Delete my data'. Workflow must be clean, audited, and reversible for 30 days. | medium |
| 21. | Inventory Integration
Reward stock isn't a manual field. It's tied to real inventory. Sold-out cake = sold-out reward. | medium |

1

2-Minute Merchant Onboarding

From signup to first paid bill in under 2 minutes. No setup friction.

Priority: **CRITICAL** | Scenes: 3

Scene 1: Signup to POS ready

Actor: New merchant (Ravi)

Trigger: Ravi clicks 'Start 14-day free trial' on the website.

What Merchant Does

- Fills 3 fields: shop name, WhatsApp number, business type (Bakery).
- No credit card. No email verification. No tutorial video.
- System auto-creates a default stamp card based on business type.
- POS opens immediately. Ravi is now ready to bill customers.

What Customer Sees

- First customer walks in within 2 minutes - bill processed, stamp awarded.
- Customer gets WhatsApp: 'You earned 1 stamp on Cake Lover's Card.'

Business Outcome

Merchant experiences value before being asked to invest time. Activation rate jumps from ~30% (5-step wizard) to ~85% (2-min path).

Scene 2: Progressive setup checklist

Actor: Merchant (later that day)

Trigger: Ravi has a quiet moment between customers.

What Merchant Does

- Sees a 'Complete your setup' widget with 5 optional items.
- Adds staff, skips import, customizes rewards, sets up birthdays.
- All steps are non-blocking. Ravi could ignore them forever.

What Customer Sees

- Customized rewards appear in catalog instantly.

Business Outcome

Setup becomes a side activity, not a gate. Merchants who would have abandoned at step 3 now stay engaged because the product already works.

Scene 3: First-week retention hook

Actor: Merchant (Day 3)

Trigger: Ravi opens dashboard and sees 12 stamps awarded, 4 customers, revenue.

What Merchant Does

- Sees daily summary WhatsApp with yesterday's stats.
- Decides to keep using the system. Trial converts to paid in 11 days.

What Customer Sees

- Same as Day 1 - the magic is in the merchant's behavior change.

Business Outcome

By Day 3, merchant has data they didn't have before. Switching cost becomes real. Trial to paid conversion exceeds 60%.

2

Customer Import (Optional, Multi-Source)

90% of small merchants don't have a CSV. Support what they actually have.

Priority: **CRITICAL** | Scenes: 4

Scene 1: Skip import entirely

Actor: Merchant

Trigger: Merchant just signed up. Has no customer list at all.

What Merchant Does

- Clicks 'Skip for now' on the Import step.
- Starts billing immediately. New customers auto-registered on first bill.

What Customer Sees

- Same as a walk-in registration - phone at counter, first stamp.

Business Outcome

No friction. Customer base builds organically. Average merchant captures 80% of regulars in 30 days.

Scene 2: Manual add (one at a time)

Actor: Merchant

Trigger: Merchant remembers 3-4 regulars by name.

What Merchant Does

- Opens Customers, Add Customer.
- Types name + phone + optional email. Repeats for each regular.
- Each new customer immediately gets a WhatsApp invite.

What Customer Sees

- WhatsApp: 'Welcome to Sweet Crumb Bakery loyalty program.'

Business Outcome

Fast for small lists. Merchant feels in control. No CSV skill required.

Scene 3: Excel/CSV upload

Actor: Merchant with spreadsheet

Trigger: Merchant has been tracking customers in Excel.

What Merchant Does

- Downloads CSV template from import dialog.
- Pastes Excel columns into template. Uploads.
- System shows preview: '47 to import, 3 duplicates, 2 invalid.'
- Confirms. 47 customers imported, 47 WhatsApp invites queued.

What Customer Sees

- Same welcome WhatsApp.

Business Outcome

Bulk onboarding for organized merchants. Duplicate prevention keeps data clean.

Scene 4: Phone/WhatsApp contacts paste

Actor: Merchant with phone contacts

Trigger: Merchant has all customers saved in their phone.

What Merchant Does

- Exports contacts from phone's contact app as vCard or text.
- Pastes the list into import dialog. System parses phone+name automatically.

What Customer Sees

- Same welcome WhatsApp.

Business Outcome

Reaches the 90% of small merchants who have never used Excel for customer tracking.

3

Bill Entry for Busy Stores

When 8 people are in line, search-by-name is too slow. 4 alternatives.

Priority: CRITICAL | Scenes: 4

Scene 1: Last-4-digits quick search

Actor: Cashier

Trigger: Customer says 'I have a stamp card' and recites their phone.

What Merchant Does

- Types last 4 digits of phone into POS search.
- System narrows to 2-3 matches instantly.
- Taps the right one. Customer selected in 3 seconds.

What Customer Sees

- Cashier confirms their name. Bill proceeds normally.

Business Outcome

Cuts queue time by ~12 seconds per bill. At 100 bills/day, saves 20 minutes of customer waiting.

Scene 2: Recent customers row

Actor: Cashier

Trigger: Regular customer walks in for the 3rd time this week.

What Merchant Does

- POS shows 'Recent' row with last 8 billed customers as avatars.
- Taps the customer's avatar. No typing needed.

What Customer Sees

- Cashier greets them by name before they speak.

Business Outcome

Regulars feel recognized. Recognition is the #1 driver of loyalty (per Bain & Company).

Scene 3: Favorites row

Actor: Cashier

Trigger: Merchant has flagged 5 VIPs as 'favorites' for instant access.

What Merchant Does

- POS shows 'Favorites' row above Recent with star-marked avatars.
- VIP customers get one-tap access.

What Customer Sees

- VIP feels special - cashier already has their card open.

Business Outcome

Top 20% of customers (80% of revenue) get white-glove treatment at zero marginal cost.

Scene 4: QR code scan

Actor: Customer + Cashier

Trigger: Customer has the merchant's QR card on their phone case.

What Merchant Does

- Cashier taps QR icon in POS, scans the customer's card.
- Customer identified in 1 second.

What Customer Sees

- No phone number needed. Just present the QR card.

Business Outcome

Fastest identification. Ideal for high-volume stores. Eliminates spelling mistakes.

4

Stamp Card Lifecycle & History

What happens after a card is redeemed? Customer keeps their full story.

Priority: **CRITICAL** | Scenes: 4

Scene 1: Card completion to reward ready

Actor: Customer (Meera)

Trigger: Meera's 9th stamp is awarded on her Cake Lover's Card.

What Merchant Does

- n
- .

What Customer Sees

- WhatsApp: 'You've completed your Cake Lover's Card. Visit us to claim your Free Cupcake!'

- Card visual shows all 9 stamps filled in gold with 'Ready to redeem!' badge.

Business Outcome

Customer is now motivated to return. Redemption rate is ~70% within 14 days.

Scene 2: Redemption to new empty card starts

Actor: Customer + Cashier

Trigger: Meera returns to redeem her free cupcake.

What Merchant Does

- Cashier opens Rewards, Free Cupcake, Meera, Confirm.
- Old completed card marked 'redeemed' (preserved in history).
- New empty card auto-creates on Meera's next bill.

What Customer Sees

- WhatsApp: 'You've redeemed: Free Cupcake. Thanks for being a loyal customer.'
- Profile shows: 'Lifetime cards: 1 completed, 1 redeemed, 1 in progress (0/9)'.

Business Outcome

Customer sees their progress over time. Feels like accumulating medals, not just spending.

Scene 3: Lifetime history view

Actor: Customer (via merchant)

Trigger: Meera asks 'How many free cupcakes have I earned total?'

What Merchant Does

- Opens Meera's profile, Lifetime History tab.
- Shows: 4 completed cards, 4 redemptions, 42 lifetime stamps.
- Timeline view shows each card with date completed, redeemed, reward claimed.

What Customer Sees

- Their full loyalty journey - like a passport of visits.

Business Outcome

Customer feels invested in their history. Switching to competitor means losing their story.

Scene 4: Achievement timeline

Actor: Customer

Trigger: Customer crosses a milestone (5 referrals, 8-week streak, Gold tier).

What Merchant Does

- t
- .

What Customer Sees

- WhatsApp: 'Achievement unlocked: 8-Week Streak! You've visited us 8 weeks in a row.'
- Profile shows badges: First Stamp, First Reward, Silver, Gold, Streak Master.

Business Outcome

Gamification drives frequency. Customers visit more often to unlock the next badge.

5

Merchant Daily Dashboard

What a merchant sees at 9 AM, 1 PM, and 9 PM. The day on one screen.

Priority: **HIGH** | Scenes: 3

Scene 1: Morning open (9 AM)

Actor: Manager (Sunita)

Trigger: Sunita unlocks the store and opens the POS tablet.

What Merchant Does

- Sees morning briefing: 'Today's plan'.
- Shows: 3 birthdays this week, 2 pending redemptions, 1 reward low-stock alert.
- Pending WhatsApp queue: 0 (all delivered overnight).
- Yesterday's summary: 12 bills, revenue, 3 new customers, 2 reviews requested.
- Sunita stocks the low-stock reward (Free Pastry - only 4 left).

What Customer Sees

- Indirect - Sunita is ready before the first customer walks in.

Business Outcome

Manager starts day with clear to-do list. No missed birthdays, no out-of-stock redemptions.

Scene 2: Mid-day pulse (1 PM)

Actor: Owner (Ravi, remote)

Trigger: Ravi opens mobile dashboard from phone during lunch.

What Merchant Does

- Sees live KPIs: today so far - 7 bills, revenue, 8 stamps awarded.
- Sees 'Top customer today' - Meera came back (8/9 on her card now).
- Sees 'Pending approvals' - 1 high-value redemption needs manager sign-off.
- Approves from phone. Customer gets WhatsApp in 30 seconds.

What Customer Sees

- Smooth approval - no 'I'll have to call you back' friction.

Business Outcome

Owner can manage remotely without being a bottleneck.

Scene 3: End-of-day close (9 PM)

Actor: Owner

Trigger: Store closes. Ravi opens dashboard one last time.

What Merchant Does

- Sees: today's revenue, 18 bills, 2 redemptions, 1 new customer, 1 review submitted (5-star).
- Reputation score went from 78 to 80.
- Churn list: Arjun moved to dormant. Win-back auto-queued for tomorrow.
- Tomorrow's preview: 1 birthday reminder to send at 9 AM.

What Customer Sees

- Indirect - but tomorrow's birthday customer will get a surprise WhatsApp.

Business Outcome

Owner closes day with full clarity. Tomorrow is pre-queued. Owner sleeps well.

Priority: **HIGH** | Scenes: 4

Scene 1: VIP tier upgrade

Actor: Customer (Meera)

Trigger: Meera's lifetime spend crosses Rs 5,000.

What Merchant Does

- System auto-upgrades Meera to Gold tier.
- Cashier sees a gold badge next to Meera's name at POS.

What Customer Sees

- WhatsApp: 'Congratulations Meera! You're now a Gold Member. Enjoy 20% bonus stamps + free birthday reward!'
- Stamp card now has a gold border.
- Future bills award 1.2 stamps (rounded up) instead of 1.

Business Outcome

Customer feels recognized for their spend. Top customers stop shopping around - they want to maintain their tier.

Scene 2: Streak celebration

Actor: Customer (Kavya)

Trigger: Kavya visits for the 8th consecutive week.

What Merchant Does

- S
- y
- s
- t

- e
- m

- e
- n
- t
- .

What Customer Sees

- WhatsApp: 'Achievement unlocked: 8-Week Streak! Keep it going!'
- Profile shows a flame icon with '8' next to it.

Business Outcome

Streak psychology (a la Duolingo) drives weekly visit habit. Streak customers visit 2.3x more often.

Scene 3: Milestone surprise

Actor: Customer (Meera)

Trigger: Meera earns her 50th lifetime stamp.

What Merchant Does

- Owner sees milestone alert on dashboard.
- Decides to surprise Meera with a free pastry on next visit.

What Customer Sees

- When Meera next visits, cashier says 'Your 50th stamp was special - here's a free pastry on the house.'

Business Outcome

Unexpected generosity creates a story customers tell their friends. Word-of-mouth CAC = Rs 0.

Scene 4: Birthday celebration

Actor: Customer + Merchant

Trigger: It's Meera's birthday week.

What Merchant Does

- System sends WhatsApp 7 days before: 'Your birthday is coming up! Free slice waiting.'
- When Meera visits during birthday window, cashier taps 'Redeem Birthday Reward'.
- 3 bonus stamps awarded + a free slice handed over.

What Customer Sees

- Pre-birthday WhatsApp reminder.
- On visit: 'Happy Birthday Meera! Here's your free slice + 3 bonus stamps.'
- Feels remembered. Tells her family.

Business Outcome

Birthday customers bring 2.3 additional people on average. Birthday redemption = highest-revenue visit of the year.

7

Win-back Escalation (30 / 45 / 60 / 90 days)

A 4-stage ladder from gentle nudge to personal owner call. Never lose a customer silently.

Priority: HIGH | Scenes: 5

Scene 1: Day 30 - Gentle reminder

Actor: System (automated)

Trigger: Arjun hasn't visited in 30 days.

What Merchant Does

- N
- o
- t
- h
- i
- n

- c
- a
- l
- l
- y
- .

What Customer Sees

- WhatsApp: 'Hi Arjun! It's been a month since your last visit. We'd love to see you again soon!'

Business Outcome

~25% of customers return within 7 days of a Day-30 reminder. Cost: free.

Scene 2: Day 45 - Soft offer

Actor: System (automated)

Trigger: Arjun didn't respond to Day-30. Now at 45 days.

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
-

- c
- a
- l
- l
- y
- .

What Customer Sees

- WhatsApp: 'Hi Arjun! Here's a surprise - double stamps on your next visit. Valid for 7 days only.'

Business Outcome

~15% more return. Cost: small (some stamp inflation).

Scene 3: Day 60 - Manager personal call

Actor: Manager (Sunita)

Trigger: Arjun still hasn't returned. System escalates to manager's task list.

What Merchant Does

- Sunita sees task: 'Call Arjun - 60 days inactive'.
- She calls. Asks if everything is okay. Listens.
- Logs the call outcome in the system.

What Customer Sees

- A real phone call. Feels personally cared for, not just marketed to.

Business Outcome

~10% more return. Personal touch recovers customers who would have churned silently.

Scene 4: Day 90 - Owner intervention

Actor: Owner (Ravi)

Trigger: Arjun at 90 days. Last chance.

What Merchant Does

- Ravi sees urgent task: 'Call Arjun - about to lose'.
- Calls personally. Offers a free reward to win back.
- Logs outcome.

What Customer Sees

- Owner's personal call. Maximum emotional weight.

Business Outcome

~5% recovery on hard-to-save customers. Even when lost, owner has closure.

Scene 5: Day 120 - Lost customer

Actor: System

Trigger: Customer has not returned after Day 90.

What Merchant Does

- Customer marked as 'churned'.
- Removed from active win-back queue. Still in database for future campaigns.

What Customer Sees

- No more messages. Door is always open if they return.

Business Outcome

Clean data. Owner knows exactly how many customers were lost and can analyze why.

8

Google Review Engine (Restored Core Pillar)

Stamps + Referrals + Reviews = the 3 pillars. Reviews drive new customer acquisition.

Priority: HIGH | Scenes: 6

Scene 1: Review request triggers

Actor: System

Trigger: Customer redeems a reward (best moment to ask - they're happy).

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
-
- -
-
- s
- y

- f
- t
- e
- r
-
- r
- e
- d
- e
- m
- p

- t
- i
- o
- n
- .

What Customer Sees

- WhatsApp: 'Thanks for redeeming your Free Cupcake! Would you mind leaving us a quick Google review? We've drafted one for you.'
- Below: a draft review (AI-written) + 'Submit as is' + 'Edit & Submit' buttons.

Business Outcome

Removes the friction of 'what do I write?'. AI draft boosts review completion from 8% to 35%.

Scene 2: AI draft generation

Actor: System

Trigger: Customer taps 'Edit & Submit'.

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
- .

What Customer Sees

- AI draft personalized: 'Absolutely loved my recent visit to Sweet Crumb Bakery! I redeemed my stamps for a free cupcake and it was perfect...'
- Customer can edit any part, change the rating, or submit as-is.

Business Outcome

Even customers who 'don't have time to write a review' can submit in 30 seconds.

Scene 3: Review bonus stamps

Actor: System

Trigger: Customer submits the review.

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
- .

What Customer Sees

- WhatsApp: 'Thanks for your review! You've earned 2 bonus stamps.'
- Bonus breakdown: 1 for submitting + 1 for 5-star rating.

Business Outcome

Incentivizes reviews without paying cash. Each Google review is worth ~Rs 2,000 in new-customer acquisition value.

Scene 4: Photo bonus

Actor: Customer

Trigger: Customer attaches a photo of their cake to the review.

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
- .

What Customer Sees

- WhatsApp: 'Photo bonus! +2 more stamps for adding a photo. Total: 4 bonus stamps!'

Business Outcome

Photo reviews are 3x more trusted by potential customers. Worth the bonus stamps.

Scene 5: Reputation impact dashboard

Actor: Owner

Trigger: Ravi opens the Reviews tab on the dashboard.

What Merchant Does

- Sees reputation score: 80/100 (up from 75 last week).
- Avg Google rating: 4.8 stars (12 reviews).
- Recent reviews list with full text + photo.
- Can respond to reviews from the dashboard.

What Customer Sees

- Indirect - but new customers searching 'bakery near me' see Sweet Crumb with 4.8 stars + photos.

Business Outcome

Reputation becomes a tracked metric, not a vague feeling. Owner can correlate review activity with footfall.

Scene 6: Negative review recovery

Actor: Manager

Trigger: Customer leaves a 2-star review citing 'stale cake'.

What Merchant Does

- Sunita sees the review in real-time.
- Calls the customer within 2 hours. Apologizes. Offers a free replacement.
- Customer edits review to 4 stars: 'Owner reached out personally and fixed it.'

What Customer Sees

- Feels heard. Updates review. Tells friends about the great recovery.

Business Outcome

Negative review converted into a positive one. Future customers see the recovery story - builds trust.

9

Birthday Journey

Birthday = highest-revenue visit of the year. Automated, personalized, never missed.

Priority: **HIGH** | Scenes: 5

Scene 1: Birthday capture

Actor: Cashier + Customer

Trigger: New customer registers. Cashier asks 'When's your birthday?'

What Merchant Does

- Cashier enters birthday (month + day) during registration.
- System schedules the birthday journey automatically.

What Customer Sees

- Just answered a casual question. Doesn't feel like marketing.

Business Outcome

~70% of customers share birthday when asked casually. Sweet Crumb now has a year-round reason to reach out.

Scene 2: 7-day reminder

Actor: System

Trigger: 7 days before customer's birthday.

What Merchant Does

- N
- o
- t
- h
- i
- n
- g
-
- -
-
- a
- u
- t
- o
- m
- a
- t
- e
- d
- .

What Customer Sees

- WhatsApp: 'Hi Meera! Your birthday is coming up. Sweet Crumb has a free slice waiting for you this week!'

Business Outcome

Customer is reminded the bakery exists. Plans to visit. Mentions to friends 'it's my birthday, let's get cake'.

Scene 3: Birthday visit & redemption

Actor: Customer + Cashier

Trigger: Meera visits during her birthday week.

What Merchant Does

- Cashier sees a 'Birthday reward ready' badge on Meera's profile.
- Taps 'Redeem Birthday Reward'.
- 3 bonus stamps awarded + free slice handed over.
- Cashier says 'Happy Birthday Meera!'

What Customer Sees

- Free slice + 3 bonus stamps + warm birthday wishes.
- Feels special. Often brings family (who also register).

Business Outcome

Birthday customer brings 2.3 people on average. Ticket size 2.5x normal. Highest ROI visit of the year.

Scene 4: Birthday cake pre-order (upsell)

Actor: Customer (Kavya, Platinum VIP)

Trigger: Kavya's birthday is in 2 weeks. She wants a custom cake.

What Merchant Does

- System sends Kavya a personalized offer: 'As a Platinum VIP, get 20% off your birthday cake pre-order.'
- Kavya pre-orders a Rs 2,500 cake for Rs 2,000.

What Customer Sees

- VIP-feeling offer + a beautiful custom cake on her birthday.

Business Outcome

High-ticket upsell. Locks in revenue before the birthday even arrives.

Scene 5: Missed birthday (recovery)

Actor: System

Trigger: Customer didn't visit during birthday week.

What Merchant Does

- System marks birthday as 'missed' after window closes.
- Sends a 'belated' message: 'We missed you on your birthday! Here's a belated treat - valid for 3 more days.'

What Customer Sees

- Belated offer. Often still redeems.

Business Outcome

Doesn't waste the birthday data. Recovery rate ~20%.

Priority: **HIGH** | Scenes: 1

Scene 1: Refund request

Actor: Customer (Meera) + Cashier

Trigger: Meera returns a cake: 'It was stale.'

What Merchant Does

- Cashier listens, apologizes, calls manager.
- Manager Sunita opens the original bill, taps 'Refund'.
- System reverses the 1 stamp awarded for that bill.
- Sunita offers Meera a replacement cake or full refund. Meera chooses replacement.

What Customer Sees

- Smooth handling - no friction, no defensive behavior.
- Stamp count drops from 7/9 to 6/9 (reflects the reversed stamp).
- WhatsApp: 'Your bill has been refunded. 1 stamp reversed. We're sorry for the inconvenience.'

Business Outcome

Handled well, a refund becomes a loyalty moment. Meera tells 2 friends how well Sweet Crumb handled her complaint.

Priority: **HIGH** | Scenes: 2

Scene 1: Phone change

Actor: Customer + Cashier

Trigger: Meera walks in: 'I changed my phone, lost WhatsApp at the old number.'

What Merchant Does

- Cashier opens Meera's profile, updates her phone number.
- System validates the new number isn't already registered.
- All future WhatsApp messages go to the new number.
- Stamp balance is intact - identified by name + face, not phone.

What Customer Sees

- Next visit, WhatsApp notifications arrive at the new number. No loyalty loss.

Business Outcome

Loyalty is tied to the customer, not the phone. Zero churn from phone changes.

Scene 2: Lost WhatsApp access (no new number)

Actor: Customer

Trigger: Customer uninstalled WhatsApp. Doesn't want it back.

What Merchant Does

- Cashier toggles 'WhatsApp opt-in: off' on the customer's profile.
- Future stamps still awarded at POS - customer just doesn't get WhatsApp notifications.
- Customer can ask cashier 'How many stamps do I have?' anytime.

What Customer Sees

- Still earns stamps. Just no WhatsApp. Cashier tells them their balance on request.

Business Outcome

Loyalty program works for non-WhatsApp customers too. No lock-in to one platform.

Duplicate Customer - Merge & Clean

Same customer registered twice with slightly different names. How to fix without losing history.

Priority: **HIGH** | Scenes: 1

Scene 1: Duplicate detected

Actor: Cashier

Trigger: Customer walks in, gives phone. Search shows 2 records: 'Meera Iyer' and 'Meera Iyer (Bakry)'.

What Merchant Does

- Cashier flags the duplicate to manager.
- Sunita opens both profiles, compares bills/stamps.
- Merges: 'Meera Iyer (Bakry)' into 'Meera Iyer'.
- All bills, stamps, redemptions from the duplicate are migrated to the canonical record.
- Duplicate record soft-deleted.

What Customer Sees

- Nothing visible. Next visit, all their history is under one record.

Business Outcome

Clean data. No stamp inflation from duplicates. Customer profile is single source of truth.

Priority: **HIGH** | Scenes: 1

Scene 1: Out-of-stock redemption attempt

Actor: Customer + Cashier

Trigger: Kavya wants to redeem 'Free Brownie' - system shows stock = 0.

What Merchant Does

- POS shows: 'Reward out of stock. Offer alternatives?'
- Cashier offers: 'We're out of brownies. Would you like a free cupcake instead, or shall I save your card for when brownies are back?'
- Kavya chooses cupcake. Cashier overrides reward selection.

What Customer Sees

- Got an alternative immediately. Didn't lose her completed card.

Business Outcome

Customer not penalized for merchant's stock issue. Alternative redemption converts a would-be disappointment into a positive moment.

Merchant Changes Reward Rules Mid-Program

Bakery decides to switch from 'buy 9 get 1' to 'buy 6 get 1'. What happens to existing cards?

Priority: **HIGH** | Scenes: 2

Scene 1: Rule change decision

Actor: Owner

Trigger: Ravi finds that 9 stamps feels too far away. Wants to make it 6.

What Merchant Does

- Ravi edits the active stamp card: 9 to 6 stamps required.
- System shows impact preview: '3 customers at 6+ stamps will immediately have completed cards.'
- Ravi confirms. New rule applies immediately.
- Customers at 6+ stamps get auto-completion + WhatsApp 'reward ready'.

What Customer Sees

- Some customers suddenly see their card completed - delightful surprise.
- Others see their progress bar jump closer to the goal.

Business Outcome

Rule change becomes a positive event, not a confusing one. System handles transition gracefully.

Scene 2: Reward cost change

Actor: Owner

Trigger: Ravi wants to make 'Free Cupcake' cost 2 cards instead of 1.

What Merchant Does

- Edits the reward: stampsCost 1 to 2.
- System warns: 'Customers with 1 completed card but no second card can no longer redeem. Consider grandfathering.'
- Ravi chooses 'Grandfather existing completed cards for 30 days'.
- Existing completed cards remain redeemable at old cost for 30 days.

What Customer Sees

- Existing customers not surprised. New customers see updated cost.

Business Outcome

Merchant can adjust economics without burning loyal customers. Trust preserved.

Priority: **HIGH** | Scenes: 1

Scene 1: Spend threshold crossed

Actor: Customer (Meera)

Trigger: Meera's bill of Rs 450 pushes her lifetime spend past Rs 5,000.

What Merchant Does

- Cashier sees a confetti animation on the POS: 'Meera just became a Gold Member!'
- Cashier says: 'Meera, congratulations - you just hit Gold status!'
- System auto-sends WhatsApp upgrade message + grants Gold achievement badge.
- Free birthday reward auto-scheduled for Meera's next birthday.

What Customer Sees

- Surprise celebration at the counter.
- WhatsApp: 'You're now a Gold Member! Enjoy 20% bonus stamps on every visit + a free birthday reward.'
- Profile shows gold border + new achievement badge.

Business Outcome

Tier upgrade becomes a story Meera tells. Her emotional investment in the bakery deepens. She will defend her tier against competitor offers.

Priority: MEDIUM | Scenes: 2

Scene 1: Default policy

Actor: System

Trigger: Customer completes a card but doesn't redeem within 90 days.

What Merchant Does

- Default rule: completed cards expire 90 days after completion.
- 30 days before expiry: WhatsApp reminder.
- 7 days before: 'Last chance!' message.
- Day of: card expired, stamps lost. Customer notified.

What Customer Sees

- Two reminders + final notice. Fair warning.

Business Outcome

Rewards don't sit on the books forever. Accounting cleaner. Customers motivated to redeem (which means another visit).

Scene 2: Manual extension

Actor: Manager

Trigger: Loyal customer missed the expiry window. Asks manager for grace.

What Merchant Does

- Sunita opens the expired card, clicks 'Extend by 30 days'.
- Card is reactivated. Customer notified.

What Customer Sees

- WhatsApp: 'Good news! We've extended your free reward by 30 days.'

Business Outcome

Manager has discretion for VIP cases. Loyalty preserved over rigid rules.

Priority: MEDIUM | Scenes: 1

Scene 1: Branch 2 opening

Actor: Owner

Trigger: Ravi opens a second Sweet Crumb location in the next neighborhood.

What Merchant Does

- Ravi creates a new Branch record under his merchant account.
- Branch 2 has its own staff, POS, inventory.
- Loyalty program is shared: customer registered at Branch 1 can earn/redeem at Branch 2.
- Reports can be filtered by branch or aggregated.

What Customer Sees

- Walks into Branch 2, gives phone, system recognizes them from Branch 1. Seamless.

Business Outcome

Loyalty scales with the business. Customer doesn't have to re-register. Cross-branch visits deepen loyalty.

Priority: MEDIUM | Scenes: 1

Scene 1: Family registration

Actor: Customer + Cashier

Trigger: Meera comes in with her son. 'Can my son use my stamp card?'

What Merchant Does

- Cashier explains: 'Each person gets their own card for fairness. But you can refer him - you both get bonus stamps.'
- Cashier registers the son as a new customer, marks 'referred by Meera'.
- Son gets his own card + 1 referral bonus stamp. Meera gets 1 referral bonus stamp too.

What Customer Sees

- Son feels independent. Meera gets referral bonus. Family engaged.

Business Outcome

Avoids the 'shared card' problem. Referral mechanics multiply household engagement.

Priority: MEDIUM | Scenes: 2

Scene 1: Issue discovered

Actor: Merchant

Trigger: Ravi notices stamp notifications are delayed by 10+ minutes.

What Merchant Does

- Opens Support tab, clicks 'New Ticket'.
- Category: WhatsApp. Priority: Normal. Description of the issue.
- Ticket submitted.

What Customer Sees

- Indirect - customers eventually get their notifications.

Business Outcome

Merchant can self-serve issue reporting. No email back-and-forth.

Scene 2: Resolution

Actor: Support team

Trigger: Support team picks up the ticket.

What Merchant Does

- Receives WhatsApp update: 'Your ticket is being investigated.'
- 2 hours later: 'Resolved - WhatsApp provider had a temporary outage. Queue flushed.'
- Ticket marked resolved in dashboard. Ravi can rate the support experience.

What Customer Sees

- Indirect.

Business Outcome

Issue closed loop. Merchant trusts the support system. Future issues filed faster.

Priority: MEDIUM | Scenes: 1

Scene 1: Deletion request

Actor: Customer + Owner

Trigger: Meera emails Ravi: 'Please delete my data.'

What Merchant Does

- Ravi opens Meera's profile, clicks 'Request Data Deletion'.
- System requires a reason + owner confirmation.
- Meera's record is soft-deleted: she no longer appears in customer lists.
- Her data is retained in cold storage for 30 days.
- After 30 days: hard delete. All stamps, bills, redemptions, reviews permanently removed.

What Customer Sees

- WhatsApp: 'Your data deletion request has been received. Your information will be permanently removed in 30 days. Reply CANCEL to undo.'

Business Outcome

Compliant with Indian DPDP Act + GDPR. Reversible for 30 days protects against mistakes.

Priority: MEDIUM | Scenes: 2

Scene 1: Stock sync

Actor: System

Trigger: Merchant's POS inventory shows 0 cupcakes left after the last sale.

What Merchant Does

- System auto-updates 'Free Cupcake' reward stock to 0.
- Any redemption attempt now shows 'Out of stock - pick alternative'.
- Manager gets an alert: 'Restock cupcakes to reactivate Free Cupcake reward.'

What Customer Sees

- If they try to redeem, they're offered alternatives.

Business Outcome

No more phantom rewards. Inventory and loyalty stay in sync.

Scene 2: Restock

Actor: Manager

Trigger: Sunita bakes 24 fresh cupcakes.

What Merchant Does

- POS inventory updated: cupcakes = 24.
- Reward stock auto-restored to 24.
- Pending redemptions can proceed.

What Customer Sees

- Reward available again. If they had been waiting, they get a WhatsApp.

Business Outcome

Inventory changes automatically propagate to loyalty. Zero manual sync work.
